

The TETENAL lab auxiliaries offer an unique variety and selection.

Cloths

Antistatic polishing cloth

Impregnated special cloth to neutralise static charges on films, foils and plastic surfaces. Size: 24 x 30 cm, colour: blue
Art. No. 101308

Antistatic lab polishing cloth

Anti-static impregnated cloth of a special, ultra soft, fuzz-resistant fibre with hemmed edges that removes dust in one sweep and effectively prevents electrostatic charging of the surface. Top quality.
Size: 28 x 37 cm, colour: orange
Art. No. 101312

Art. No. 101308

Art. No. 101312

Cleaning Cloth

Fuzz-free, very soft special cleaning cloth with no impregnation. Ideal for use in combination with the Film Cleaner spray (Art. No. 105198) for the gentle cleaning of

films and display material: water spots, fingerprints and greasy smears can be easily removed.

Size 35 x 30 cm, colour: yellow
Art. No. 101313

High Tech Optic Cloth

Made from a material woven from hundreds of fibrillated yarns, this high-tech cloth is perfect for the gentlest possible cleaning and care of optical lenses. Advantage: fuzz-free, since no large cut edges.

Size: 20 x 25 cm, colour: white
Art. No. 101315

Art. No. 101313

Art. No. 101315

Sprays

Anti Reflex Spray

„For use on subjects“. The Anti Reflex spray eliminates interfering reflections by matting the subject to be photographed and can be easily removed after-

wards. Free from CFC's. 400 ml can
Art. No. 105195

Camera Varnish Spray

Deep matt, superfine pigment, special lacquer. Perfect for minor repairs to cameras, lenses, optical equipment, etc. Free from CFC's. 200 ml can.
Art. No. 105202

Art. No. 105195

Art. No. 105202

Anti Dust Professional

The large can for professional use also comes complete with a spray valve and separate tube. Yield: approx. 125 litres of compressed gas. Free from CFC's. 500 ml can
Art. No. 103043

Anti Dust Spray

Dust is an enemy in the photographic laboratory – blow it away with Anti Dust. This highly-pressurised gas quickly and effectively removes dust particles. Fields of use: photo, computer equipment, hi-fi, electronic devices, etc. The 200 ml spray

comes complete with a spray valve and supplies around 50 litres of compressed gas. An enclosed flexible tube allows you to clean even angular lenses.

Free from CFC's. 200 ml can

Art. No. 103030

Art. No. 103043

Art. No. 103030

Antistatic Spray

Surfactive agent to eliminate and prevent static electricity on metal, glass, plastic, e.g. on machines, equipment, films and foils. The finely dosed solvent evaporates immediately so you don't have to polish with a cloth. A very thin layer of the antistatic agent is left on the surface which has no negative chemical or optical effects on the film material. Free from CFC's. 400 ml can
Art. No. 105194

Art. No. 105194

Art. No. 101638

Anti-Newton Spray

Prevents the formation of Newton's rings when scanning films. Main field of use: professional drum scanners. The Anti Newton Spray is easily removed after scanning with Tetenal Film cleaner. Free from CFC's. 200 ml can
Art. No. 101638

Anti Dust Mini CO₂ Cartridge Spray

Very small compressed air valve with spray head and integrated CO₂ cartridge to remove dust from inaccessible points. High pressure, yet can be finely dosed. Advantage: The compressed gas is non-residue and non-flammable. Refill cartridges available separately.
Art. No. 103048

Anti Dust Mini CO₂ Cartridges

Refill pack for Anti Dust Mini (Art. No. 103048) with 6 cartridges of 12 g of natural carbon dioxide. Use original cartridges to refill TETENAL Anti Dust Mini since CO₂ cartridges from other fields of use often contain uncleaned gases or gas mixed with oil which could soil the objects to be cleaned.

Art. No. 103049

Art. No. 103048

Art. No. 103049

Protectan Spray

Protective gas. Avoids the premature oxidation of photographic baths. Prolongs the service life of concentrates and working solutions. Easy to use: spray Protectan into partially filled bottles / canisters - the neutral, heavy gas displaces the air and thus provides lasting protection. Free from CFC's. 400 ml can
Art. No. 105193

Light Protecting Varnish Spray, glossy/matt

Light, heat and moisture gradually attack and dissolve the pigments in colour photos over time. The consequence: the photos slowly become faded or develop spots. TETENAL light stabiliser spray offers effective protection: thanks to its very high share of UV absorbers it converts the UV radiation in light that destroys the pigments into energetic light. Simply spray on and the transparent lacquer film reliably seals the surface of the photo. Laboratory tip: Only use the glossy version for ink jet papers such as TETENAL spectra jet. Free from CFC's. 400 ml can
Art. No. 105190/105192

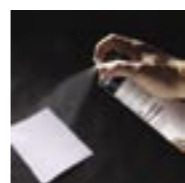

Art. No. 105193

Art. No. 105190/105192

Spray Adhesive Super

This special adhesive was exclusively developed for the imaging sector and is ideal for the fast and flexible laminating of photos, posters and drawings on cardboard, chip board, metal and many other materials. The elastic, waterproof adhesive layer produces a permanent bond as soon as the photos are pressed into place. Their position can be easily corrected beforehand; creases and bubbles can also be „wiped away“. Free from CFC's. 400 ml can
Art. No. 102216

Spray Adhesive Super
400 ml can
Art. No. 102216

Cleaners and anti-algae agents

Film Cleaner Spray

Film cleaner spray to remove fingerprints, dust or grease spots on all types of films and display materials. Easy to use. Spray film cleaner directly onto the film and wipe over with a cleaning cloth (see Art. no. 101313) or spray onto a cotton cloth and then draw the film through your fingers. Free from CFC's. 400 ml can
Art. No. 105198

Film Cleaner Spray
400 ml can
Art. No. 105198

Cleaning Strips for Film Processors
pack of 20 strips
Art. No. 103072

Cleaning Strips for Film Processors

Laboratory owners know the problem: as soon as the workload eases off a little, deposits quickly accumulate on the rollers. The consequence: dirty or even scratched films. Cleaning strips from Tetenal have the remedy: simply stick the strip onto the leader card and run through the developer before the start of production - the special coating attracts dirt and frees the rack rollers

from deposits.

Size: 61 x 400 mm, pack of 20 strips.

Art. No. 103072

Art. No. 103402

Art. No. 104571/104575

Colourlab Cleaner

Highly effective, non-flammable cleaner for plastic and stainless steel. The Colourlab Cleaner is ideal for the „intermediate cleaning“ of colour developer racks. It is very easy to use: spray the cleaner onto the surfaces to be cleaned, leave to take effect for a minute or two and rinse off with water. 0.5 l bottle with integrated spray head.
Art. No. 103402

Algenex Plus

A liquid version of Algenex. It has a broad-spectrum effect against algae and microbiological growth in photographic wash tanks. Suitable for colour and b&w machines. Dose according to the microbiological growth: 1.5-3 ml per litre of water. Add at the end of work. Available in the sizes 1 litre and 5 litres.
Art. No. 104571/104575

Algenex Tablets

Algenex tablets very efficiently prevent microbiological growth and soiling in wash tanks, in b&w or colour machines. Do not use for the intermediate wash of colour processors. The practical dispenser is simply suspended in the water tanks. Active chlorine is gradually released thanks to the depot effect. Replace every 2-3 weeks. 10 tablets of 20 g.
Art. No. 106080

Art. No. 106080

Art. No. 103152

Super Rinse TSC tablets

Super rinse in a tablet form for minilabs such as Frontier. For 100 x 5 litres.

Art. No. 103152

DEV Tank Cleaner

Special cleaner for the effective and gentle deep cleaning of b&w and colour developer tanks. Prescribed for b&w machines that are operated with hydroquinone-free developers such as the TETENAL Eukoprint Professional AC. Pack for 2 x 5 l with neutraliser.
Art. No. 104005

Art. No. 104005

Art. No. 100894

Water Tank Cleaner

Highly effective powdered cleaner for water tanks in b&w processes, X-ray and reprographic developers. Easily removes stubborn dirt and deposits such as silver, silver sulphide, lime, etc. Pack for 5 x 15 litres
Art. No. 100894

Organisation aids

Red Splicing Tape

High-quality, red silicon adhesive tape for leader cards that sticks perfectly to film strips and leader cards and can be removed to leave no residues. The tape withstands all chemicals, is very tenacious and guarantees easy unrolling thanks to the special coating on its rear. 19 mm x 66 m
Art. No. 103241

Sleeving Material for Films

Strips of negatives need protection against dust, scratches and fingerprints – this is the most effective method: the matt, non-reflecting, anti-static sleeving

Red Splicing Tape
19 mm x 66 m
Art. No. 103241

Sleeving Material for Films
available alternatively as 4, 5 or 6-row strips
Art. No. 103283/103284/103285

material allows the films to be inserted easily. The sleeving film comes on 300 m long reels and is available alternatively as 4, 5 or 6-row strips.
Art. No. 103283/103284/103285

Twin Check Labels

Duplicate laboratory numbers are the only sensible way to ensure a clear and distinctive classification of films of prints. Self-adhesive Tetenal Twin Check Labels of polyester stick firmly to the film strips and are resistant to all photographic chemicals. The labels come in packs of 4 rolls of 2500 numbers (7 x 20 mm).
Art. No. 103299

Extractor Tape

High-quality, black extractor tape for the quick and easy removal of films from 35 mm cartridges using film extractors and film pullers
Size: 16 mm x 10 m
Art. No. 103246

Twin Check Labels
4 rolls of 2500 numbers
Art. No. 103299

Extractor Tape
16 mm x 10 m
Art. No. 103246

Replacement filter for Fuji FRSS10

To demineralise tap water. Capacity, approx. 250 to 300 l of medium hardness water. Art. No. 103057

Fixing Bath Tester

For the quick and easy measurement of the silver content and pH value in b&w fixing baths. Use: dip the test strip into the fixing bath, shake off excess liquid and compare the coloured measurement field with the scale on the packaging. Restricted use in colour fix and bleach

Art. No. 103057

Art. No. 101243

fix bath too.

Pack with 100 test strips. An original Macherey & Nagel product.

Art. No. 101243

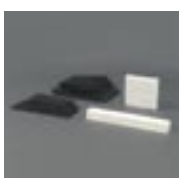

Air Filter Sets for Minilabs

Air filter sets for selected minilabs such as Fuji Frontier 350, 370. The sets contain all the air filters needed for the relevant minilab. The individual air filters are marked and can be easily fitted in the correct part of the machine by following the enclosed installation instructions. We will be pleased to send you a product overview on request. Art. No. 101430, 101431, 101434, 101438, 101444

Chemical Filters for Minilabs

The filters are pressed from special plastic and keep chemical baths free from dirt, prevent the formation of smears and avoid a drop in contrast for colour developers thanks to their excellent absorption capacity. Replace dirty filters on a regular basis. (compatibility list overleaf)

Art. No. 101051 - 101068

Art. No. 101430/101431/101434/101438/101444

Art. No. 101051-101068

Ink Ribbons for Minilabs

Special ink ribbons for printing on the rear of photo papers. These are available for many of the latest types of machines. (compatibility list overleaf)

Art. No. 101415 - 101423, 101426

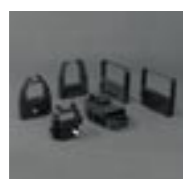

Printer Lamps for Minilabs

High-quality halogen printer lamps with a very constant colour temperature and

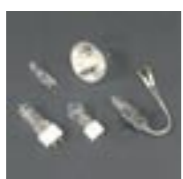

long service life. Printer lamps should be changed on a regular basis to avoid a weakening in the light intensity and associated colour disparities. Available for all common minilabs.

We will be pleased to send you a product overview on request.

Art. No. 101580 - 101590, 101408

Art. No. 101415-101423/101426

Art. No. 101580-101590/101408

Background Paper

Multi-coloured and extensive range of original Savage background paper that have been specially developed for the needs of professional photographers with a low-reflection surface and high colour saturation. With a grammage of 150 g, the Savage background papers are very durable and economical in daily use.

We will be pleased to send you our swatchbook on request. Art. No. 350557

Art. No. 350557

Art. No. 101460-101465

Leader Cards for Minilabs

Leader cards for various types of machines. We will be pleased to send you a product overview on request.

Art. No. 101460 - 101465

Gloves

Essential for prevention of fingerprints on e.g. negatives. These gloves are composed of 100 % cotton.

They minimise static charge and allow cleanly workings.

10 pair per item; Colour: white;

Sizes: S, M, L Art. No. 101480 - 101482

Gloves
10 pair per item;
Colour: white; Sizes: S, M, L
Art. No. 101480-101482

Order/Eurocombi/Media enveloper
Art. No. 103249/103250/103251

Order/Eurocombi/Media enveloper

High-quality photo packaging for quick and easy order completion. German language version.

Art. No. 103249, 103250, 103251

Spot Pen. Special pens for correction retouching

Spot Pens contain high-purity photo retouching paints that penetrate the emulsion layer without leaving any deposits on the surface. Spot Pen ink is lightfast and also free from acids - it can be used for both PE and baryta papers, matt and gloss prints.

Spotting Set for black-white with 10 retouching pens.

Art. No. 101900

BW Spotting Set: tones from light grey to neutral black

Spot Pen „Anti Red Eye“

Correction pen for colour papers to easily remove the „red eye effect“ in photos with a direct flash. Simply dab lightly on the red spots, leave to dry, ready. Spot Pen ink penetrates the emulsion with no residues and is lightfast. Even untrained persons find it quick and easy to use.

Art. No. 101930
