

## Process ECN-2 Product Range

Product	Article No.		Concentrate	Mix size	Recycling
<b>ECN-2 PREBATH AND REPLENISHER</b>					
ECN-2 PB	105360		20 L	80 L	
ECN-2 PB	105342		60 L	240 L	
ECN-2 PB	105343		200 L	800 L	
ECN-2 PB	105344		640 L	2.560 L	
<b>ECN-2 COLOUR DEVELOPER REPLENISHER</b>					
ECN-2 CD-R	105348	Part 1	15 L	300 L	
ECN-2 CD-R	105349	Part 2	15 L	300 L	
ECN-2 CD-R	105345	Part 1	60 L	1.200 L	
ECN-2 CD-R	105346	Part 2	60 L	1.200 L	
ECN-2 CD-R	105368	Part 1	200 L	4.000 L	
ECN-2 CD-R	105368	Part 2	200 L	4.000 L	
<b>ECN-2 COLOUR DEVELOPER STARTER</b>					
ECN-2 CD-S	105347		10 L	500 L	
<b>ECN-2 / ECP-2 BLEACH REPLENISHER AND REGENERATOR</b>					
ECN-2 / ECP-2 BL-RCY	105363		60 L	150 L	1.500 L
ECN-2 / ECP-2 BL-RCY	105364		200 L	500 L	5.000 L
ECN-2 / ECP-2 BL-RCY	105365		640 L	1.600 L	16.000 L
<b>ECN-2 / ECP-2 FIXER AND REPLENISHER</b>					
ECN-2 / ECP-2 FX-R	105367		60 L	300 L	
ECN-2 / ECP-2 FX-R	105370		200 L	1.000 L	
ECN-2 / ECP-2 FX-R	105371		640 L	3.200 L	
<b>ECN-2 / ECP-2 FIXER REGENERATOR</b>					
ECN-2 / ECP-2 FX-RCY	105379		60 L	1.500 - 2.400 L	1800 L
ECN-2 / ECP-2 FX-RCY	105380		200 L	5.000 - 8.000 L	6.000 L
ECN-2 / ECP-2 FX-RCY	105381		640 L	16.000 - 24.000 L	19.220 L
<b>ECN-2 / ECP-2 STABILIZER AND REPLENISHER</b>					
ECN-2 / ECP-2 STAB	105372		2,5 L	250 L	
ECN-2 / ECP-2 STAB	105366		10 L	1.000 L	
ECN-2 / ECP-2 STAB	105373		60 L	6.000 L	
ECN-2 / ECP-2 STAB	105374		200 L	20.000 L	
ECN-2 / ECP-2 STAB	105382		640 L	64.000 L	

## Process ECN-2 Technical Data

### ECN-2 PREBATH AND REPLENISHER

Concentrate on Carbonate basis.

Number of parts: 1.

Repl. rate: 400 ml / 100 ft

Time / Temperature: 10 sec / 27°C

Starter: no starter required, replenisher and working solution are identically.

750 ml water + 250 ml conc. = 1.000 ml replenisher

### ECN-2 COLOUR DEVELOPER REPLENISHER

Colour Developer replenisher for the ECN-2 standard process.

Number of parts: 2

Repl. rate: 900 ml / 100ft

Time / Temperature: 3:00 min / 41,1°C

Starter: Art.No. 105347

900 ml water + 50 ml Part 1 + 50 ml Part 2 = 1.000 ml replenisher

### ECN-2 COLOUR DEVELOPER STARTER

Starter to mix the working solution from the ECN-2 Colour Developer replenisher.

Number of parts: 1.

905 ml water + 37,5 ml Part 1 + 37,5 ml Part 2 + 20 ml CD-S = 1.000 ml working solution

230 ml water + 750 ml ECN-2 CD-R + 20 ml CD-S = 1.000 ml working solution

### ECN-2 / ECP-2 BLEACH REPLENISHER AND REGENERATOR

Bleach for processing color negativ films in the ECN-2 standard process. Concentrate for mixing the replenisher and regeneration of the overflow.

Number of parts: 1.

Repl. rate: 400 ml / 100ft

Time / Temperature: 1:00 min / 27°C

600 ml water + 400 ml conc. = 1.000 ml replenisher

960 Overflow + 40 ml conc.\* = 1.000 ml replenisher

\* The regenerator volume depends on the carry-over rate

### ECN-2 / ECP-2 FIXER AND REPLENISHER

Fixer for processing color negativ films in the ECN-2 standard process. Concentrate for mixing replenisher.

Number of parts: 1.

Repl. rate: 600 ml/100ft

Time / Temperature: 1 min / 38° C.

800 ml water + 200 ml conc. = 1.000 ml replenisher

### ECN-2 / ECP-2 FIXER REGENERATOR

Fixer for processing color negativ films in the ECN-2 standard process. Concentrate for regenerating the overflow.

Number of parts: 1.

Repl. rate: 600 ml/100 ft.

Time / Temperature: 1:00 min / 38°C

966,6 ml Overflow + 33,3 ml conc.\* = 1.000 ml replenisher

\* The regenerator volume depends on the carry-over rate.

### ECN-2 / ECP-2 STABILIZER AND REPLENISHER

Stabilizer for processing color negativ films in the ECN-2 standard process.

Number of parts: 1.

Repl. rate: 400 ml / 100 ft

Time / Temperature: 10 sec / 27 – 38°C

900 ml water + 10 ml conc. = 1.000 ml replenisher
